Cunningham 

AUTHOR, SPEAKER, AND LIVING KIDNEY DONOR

Amy Gray-Cunningham is passionate about helping others understand the power of listening to the calm, still voice within and daring to believe in the impossible. On July 6, 2011, she donated a kidney to a complete stranger after hearing God's voice announce to her she would save this man's life and be his 1-in-20 million miracle match.

PRESENTATION DESCRIPTION

Daring to Believe

What might you be called to do if you only dared to believe?

As a living kidney donor, Amy shares her experience of hearing and acting upon her inner calling, and how living a life of faith can transform a personal destiny. Amy—just an ordinary person, did something extraordinary. She will share her doubts and fears with you, along with the challenges she experienced, especially when it came to telling her family about her decision to donate a kidney to a stranger.

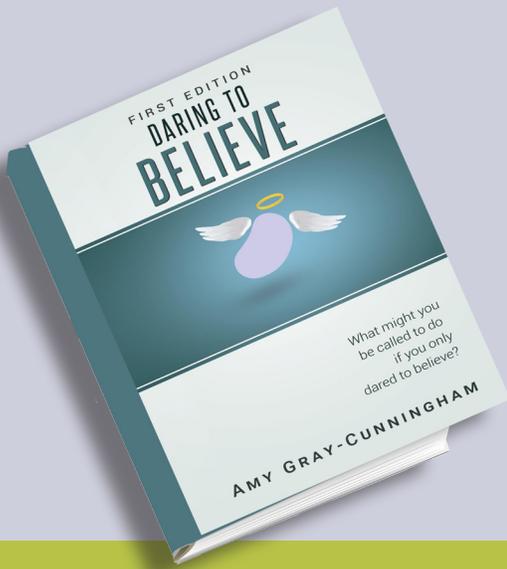

Amy will—

- Inspire you to listen to your inner calling in life.
- Share information about living kidney donation in an exciting and humorous manner.
- Explain what it means to live a life of faith and the courage it takes to overcome adversities.

"Amy Cunningham speaks at our National Kidney Foundation events and the audience loves her perspective of the story. She educates, informs and explains realistic expectations of being a living donor."

—Lisa Hedin, RN

Unfortunately while researching about becoming a living kidney donor, Amy couldn't find many books on the subject. So a few years after the transplant, she wrote a book that chronicled her journey throughout the kidney donation process.

Daring to Believe is a resource for other potential living donors to understand what to expect. It's also an inspirational story about following God's calling in your life even when everything seems impossible.

Amy's book *Daring to Believe* is available in paperback and Kindle on [Amazon](#).

"Amy exudes genuine compassion and humor, especially when discussing her experience as a living donor. She connects deeply with her audience by sharing her thoughts and feelings about her decision to donate, the procedure, and the loving support she received from her husband, as well as her kidney recipient and his family."

"As a registered nurse that specializes in kidney disease and Ms. North Carolina, I have traveled the country teaching and educating the public about kidney disease and transplantation. I recognize that there is very little information out there to guide a living donor. I am so thankful that Amy wrote a book so living donors can use this as a resource."

Lisa Hedin

Registered Nurse
